

EtherCAT: the Fastest Industrial Protocol – Now also available from Unitronics

Flexible • Fast • Precise • Easy Integration

*UniStream USC PLCs only

EtherCAT— the fastest growing communication protocol in the world that drives precise processes in factories across the globe—now easily implemented by UniStream® PLCs

1 ,2, 3: See article No's and Capabilities, bottom Page 2

Benefits:

Simple, flexible,
transparent system setup

Easy wiring - reduce costs,
minimize complexity

3rd-party devices easily integrated -
just import the ESI

Servo and Remote I/O
by Unitronics—
EtherCAT Fieldbus
supports all components

Include a total of up to 32
EtherCAT nodes

Seamless integration
with UniLogic –
2 clicks & you're ready
to roll with EtherCAT

Upgrading your Servo projects to EtherCAT—

a few quick clicks in Hardware Configuration enables you to enjoy the same great features:

- Totally transparent, automatic setup and management
- Download Ready-Made Motion code and get moving immediately – No programming needed!
- Diagnostics: view servo run-time performance via UniLogic's built-in powerful, high-speed scope
- Tune your system: using only one single parameter

* EtherCAT master module is supported by UniStream PLCs (USC-B5 & USC-B10 only).

** Coming soon: EtherCAT for UniStream Modular.

Article Numbers & Capabilities:

- 1 UAC-01EC2 - Unitronics EtherCAT Master communication module supports:
 - up to 8 Servo axes
 - up to 8 Remote IO EtherCAT Adapters
 - 3rd-party EtherCAT devices, For a total of 32 EtherCAT nodes
- 2 UMD-xxxxx-E3 - Unitronics EtherCAT servo drive (50 to 5000W)
- 3 URB-EC1 - Unitronics Slim Remote IO EtherCAT Adapter, each adapter supports up to 16 standard UniStream Remote I/O modules
